HTZ i30

HTZ is WTB's first fully purpose-built eMTB wheelset for those who want to send it without wondering if their wheels will make it through the ride. Walls of an HTZ rim are up to 20% thicker than those of our already-burly KOM Tough rims. HTZ hubs feature a heat-treated steel freehub body with a six-pawl ratchet system that all engage simultaneously to evenly distribute torsional forces while pedaling with a high-torque motor. We also increased the outer diameter of the rear axle sleeve from 15mm to 17mm to increase durability while remaining compatible with 12mm thru-axles. This feature eliminates axle flex, which improves ride quality and increases bearing longevity by reducing angular load while cornering or pedaling. Double-stacked Enduro sealed bearings at the inboard end of the driver body further increase stiffness and extend bearing life. Specifically tailored to meet the demands of full-power eMTBs, all aspects of WTB's new HTZ wheels were meticulously designed to be the most dependable e-specific wheels on the market.

HTZ i30

FRONT WHEELS: \$329.95 | €299.95 • REAR WHEELS: \$439.95 | €399.95 • WHEELSETS: \$769.90 | €699.90

- Up to 20% thicker walls than KOM Tough rims
- 30mm inner rim width
- 6069 aluminum alloy
- Heat-treated steel freehub body
- 6-pawl ratchet system with simultaneous engagement
- 42 points of contact for 8.5° of engagement
- Heat sink improves heat dissipation up to 10% on long descents
- 13-gauge butted (2.3/2.0mm) spokes are oversized at the hub
- TCS Tubeless-Ready with Solid Strip integration
- 29" and 29/27.5" mullet configurations
- XD / HG / MS driver body options

WHEEL DETAILS	RIM SIZE	WEIGHT	ROTOR MOUNT	DRIVER BODY	HOLES	PART #
27.5"						
HTZ i30 x 27.5" wheel 148 x 12mm, 32h, 6-Bolt, PSB34, Shimano HG 11spd	27.5" x i30	1405g	6-Bolt	Shimano HG 11spd	32h	W045-0270
